

422 C.E.

GOLDEN AGE OF INDIA

# 8 Billion People

1800 - First billion

1927 - Second billion

130 years to double population.

Now? 58 years. Reaching 16 billion by 2082!

## World population hits 8 billion

Population growth, while slowing, continues upward trajectory and is forecast to reach 8 billion on Tuesday 15 November.

# Project:

You will be researching different countries in 4 different regions

- Regions: Europe, Asia, Oceania, Africa, North America, South America, Middle East

1. Create a population pyramid for a country in that region (4 total)

With each pyramid:

- Identify the kind of growth it has
- Find 1 significant event that happened that you can see on the pyramid (NOT SOMETHING FROM 200 years AGO!)
- Identify any issues that the growth (or lack of growth) could cause
